

4034 SPRING MOUNTAIN, ST. HELENA

THE GUEST HOUSE

The Guest House was completed in 2000. Because the main home's contractors were unavailable at the time, the structure's main frame was custom-manufactured and built on a permanent foundation with construction completed by local job contractors and approved by Napa County building inspectors. Custom work included stone front porch, shingled roof, rock and shingled siding, tile floors, cabinets, doors, interior finishes, redwood deck and more.

The building was completely restored in 2021 including a new freshwater delivery system, tile floors, water heater, interior paint, refurbished deck, all new furnishings and remodeled kitchenette with new appliances (excluding stove/oven as restricted by Napa County). The lighted pathway from the Main House was also enhanced.

All utilities are served by the main house including electricity, water, gas and emergency power generator. Satellite Direct-TV and Internet services are also provided. All furniture in the Guest House is included in the selling price.
